The **KIRJES ORGANIC OIL-WAX** is primarily intended to give a high quality surface protection to finely sanded velvety wooden surfaces. It's a product that can be used without failure by the beginner or by the professional and has the following advantages:

Art.No KJ909 (300 ml)

- **a 2 in 1 product.** The oil penetrates into and impregnates the wood whilst the wax is left on top of the surface as a protective layer.
- **lets the wood breathe.** The Oil-Wax works on wood as the famous Gore-Tex membrane works on textiles. This ensures good protection against moisture and dirt from the outside and keeps the wood healthy from the inside.
- **derived from old traditional Swedish finishes based on Swedish cold pressed Linseed oil** mixed with bees-wax and enhanced with **wax from the Bearberry Plant** (Arctostaphylos Uva Ursi).
- **dries relatively fast** (1-2 days) due to high contents of linolenic acids in the Linseed oil, and hardens/cures within 2 weeks.
- **a pure organic product** without any additives or solvents. It is non-toxic whether in paste or dried form. Items that come in contact with food can be taken into use immediately after having been treated with Kirjes Oil-Wax.
- **easily applied** with a soft cloth or soft tissue paper. Preferably use a hot air gun or hair drier when applying the Oil-Wax. This makes the Oil-Wax even more easy to spread out and it speeds up the drying/-curing process.
- **leaves a silky matt surface** in one or two layers. Three layers or more increases gloss.

The **KIRJES BRUSH SLEEVES** (fit the Kirjes Inflatable Sanders) spreads the Kirjes Oil-Wax evenly over the seemingly smooth but fibrous and porous wood surface and buffs a first and second layer of dried Kirjes Oil-Wax.

Model	Art No	Quantity
120N	KJ820	2
130	KJ830	2
140	KJ840	2
140R	KJ840R	1

The **KIRJES CLOTH SLEEVES** (fit the Kirjes Inflatable Sanders) polishes a third or multiple layer of dried Kirjes Oil-Wax ie. when the wax has started to form a film on top of the wood surface.

Model	Art No	Quantity
